INSTRUCTIONS FOR: SAAB 9-5 NG, SAAB 9-3/9-5 DIESEL, SAAB 9-4X AND OPEL WITH MAPTUNER X

Revised 2019-03-08

⚠️ Thank you for choosing Maptun Performance as your supplier of tuning software. The following steps must be followed. <u>Please do not interrupt or disconnect MaptunerX during programming or back-up</u>.

STAGE 1 – BACK-UP

For your vehicle we need to perform a read-out of the software within the engine ECU to be sure that we deliver the latest software version for your car. Please do the following steps:

1. Make sure the **battery** is in good condition – if not, please connect a battery charger
2. Connect MaptunerX to the **OBD-connector** located under the steering wheel
3. Run the app "**Add vehicle**" on the MaptunerX
4. Download and install MyMaptuner on your PC. The software is available here: **https://maptuner.se/download/**
5. Open MyMaptuner on your PC and sign in with the log-in details that has been sent out to you in a separate e-mail when you placed your order
6. Connect MaptunerX to your computer and press "**Synchronize**" in MyMaptuner
7. Stand by and wait for Maptun Performance to confirm your software

STAGE 2 – PROGRAMMING

We will contact you either by mail or phone when the software is ready for download. When we have confirmed, follow these steps:

1. Connect MaptunerX to your computer with the **USB-cable**
2. Start MyMaptuner on your PC and press "**Synchronize**" – the software will now be downloaded to MaptunerX
3. Make sure the **battery** is in good condition – if not, please connect a battery charger
4. Connect MaptunerX to **OBD-connector** located under the steering wheel
5. Start the app "Programming" on **MaptunerX**
6. Choose the software for your car and press "**Next**"
7. On the next screen, press "**Download**"
8. When the programming is succeeded, your car has been successfully tuned
